MEMORANDUM FOR: The Record

ATTENTION : Office of Logistics/Space Planning Branch
SUBJECT : Future Space Requirements for the
Technical Services Division

1. The estimated space requirements for the Technical Services Division, both for our short range (1968) and long range (1975) plans, are attached herewith. In regard to our short range planning, the Technical Services Division will occupy the basement of South Building sometime in 1968 and intends to utilize this entire space (9000 square feet) for technical laboratories. Our long range plans argue for a separate building facility to accomodate all but one element of the TSD (i. e., our Quick Reaction Facility Laboratory located at [REDACTED] Should it be necessary or desirable in the future to move the QRF from [REDACTED] to the Langley area, an additional office/warehouse/laboratory requirement will exist with a total space requirement of 6000 square feet office, 6000 square feet warehousing, 11,000 square feet laboratory space (33,000 square feet total). ✓

4. To summarize, TSD now occupies 72,000 square feet in the 2430 "E" Street area, 17,000 square feet in the [REDACTED] and 22,000 square feet in [REDACTED] for a total of 110,000 square feet. Each of these facilities should be considered for long range planning purposes to be encompassed in a new facility in the Langley area. Allowing for a slight (7%) expansion to cover unknown contingencies, our long range requirements for a Technical Services Building at Langley will approximate 120,000 square feet.
